

Blood Lead Testing of Medicaid-Enrolled Children

Report for Individual Medicaid Providers
for the period January 1, 2008 through December 31, 2008

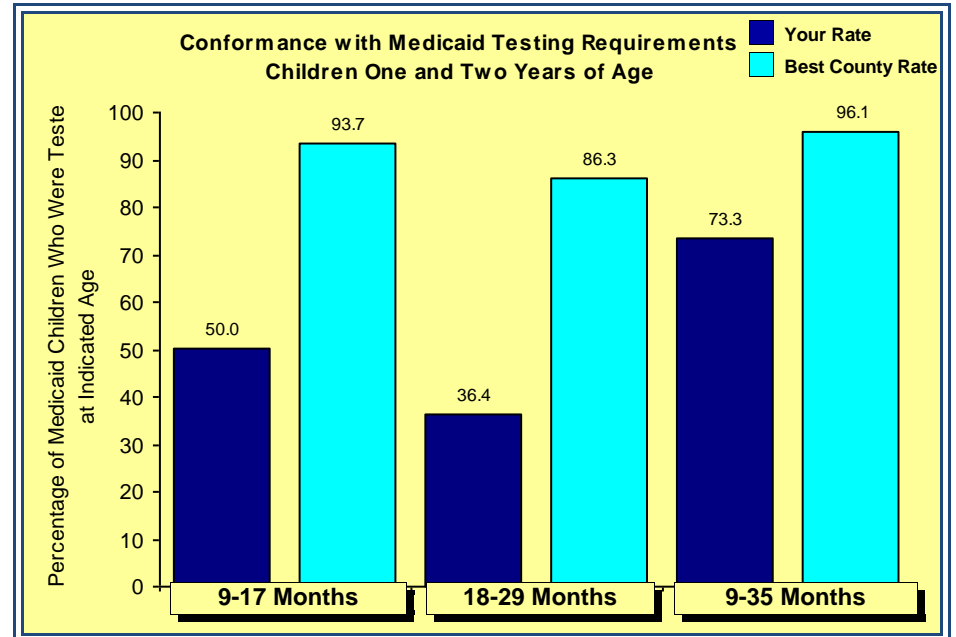

CHATHAM COUNTY HEALTH DEPT
1000 S TENTH ST
SILER CITY NC 27344-3324

Your Overall Testing Rate: ⁽¹⁾ 73.3 %
Your Testing Rate Information

Testing Numbers and Rates Among Medicaid Children	Age ⁽²⁾ 1	Age ⁽²⁾ 2
Number of Children Seen	40	22
Number of Children Tested	20	8
Testing Rate (%) ⁽³⁾	50.0	36.4
Number of Children Seen ⁽⁴⁾ But Not Tested	20	14

Explanation:

- Overall testing rate includes children ages 9-35 months.
- Age 1 includes children between 9-17 months of age. Age 2 includes children between 18-29 months of age.
- Percentage of Medicaid children who were seen by your practice and received blood lead test(s) during the indicated age by your practice or elsewhere.
- Number of children who were seen by your practice but were not tested during the indicated age.

Did You Know That...

Federal rules require that ALL CHILDREN who are enrolled in Medicaid receive a blood lead test at:

- 12 months of age and
- 24 months of age
- children between ages 36-72 months must be tested if they have not previously been tested

1,816 North Carolina children were identified with lead poisoning ($\geq 10 \mu\text{g/dL}$) during the previous five years (2003-2007)

- **82% of these children were enrolled in Medicaid**
